Overdose Survivors’ Outreach Program (OSOP)

Brian Holler, MPH
Special Programs Manager
Office of Overdose Preventions
Behavioral Health Administration
Department of Health and Mental Hygiene
Background
Describing the Epidemic (1)

Deaths from Selected Substance Intoxication
State of Maryland, 2007 to 2013

Graph showing the number of deaths from selected substance intoxication in Maryland from 2007 to 2013. The graph plots data for Heroin, Prescription Opioids, Alcohol, Cocaine, and Benzodiazepines.
Describing the Epidemic (2)

Crude Death Rates for Total Intoxication Deaths by Place of Residence, Maryland, 2010-2014.

- Crude death rate per 100,000 population
- Place of residence

- Montgomery: 4.9
- Prince George's: 6.9
- Howard: 6.9
- Garrett: 8.0
- Talbot: 9.5
- St. Mary’s: 9.6
- Charles: 10.2
- Dorchester: 12.9
- Caroline: 13.1
- Frederick: 13.5
- Maryland: 13.6
- Worcester: 13.7
- Somerset: 14.0
- Calvert: 14.2
- Kent: 14.9
- Queen Anne’s: 15.2
- Anne Arundel: 15.3
- Allegany: 15.6
- Harford: 17.0
- Washington: 17.0
- Caroline: 17.6
- Cecil: 19.0
- Baltimore City: 23.2
- Montgomery: 26.3
- Baltimore City: 29.8
### Number of Addictions-Related Emergency Department Visits for Maryland Residents

Previous Overdose as an Indicator

- In 2013, 858 individuals died of an overdose in Maryland.
  - Of these 858 individuals, 59% (n=502) had at least 1 or more visits* for an overdose up to one year prior to the overdose death. (Total overdose visits = 1,507)
  - 41% (n=356) of the individuals that died of an overdose in 2013 did not have a visit* for an overdose up to one year prior to the overdose death.

- Of these 858 individuals, 66% (n=570) had at least 1 or more visits* for any reason up to one year prior to the overdose death. (Total visits = 2,207)
  - 34% (n=288) of the individuals that died of an overdose in 2013 did not have a visit* for any reason within a year before the overdose death.

*Hospitalization or emergency department visit in Maryland.
Total ED Visits / Hospitalizations Occurring 1 Year Before Overdose Death

*Based on the 858 individuals who died of an overdose in 2013.*
Total ED Visits / Hospitalizations Occurring 1 Year Before Overdose Death

*Based on the 858 individuals who died of an overdose in 2013.*
OSOP
Program Overview
To offer overdose survivors a pathway to treatment and wrap-around services in hospital emergency rooms and in the field, as well as naloxone training, and a consistent point of contact should someone wish to enter care.

To enhance collaboration between hospitals and clinics, local health departments and treatment facilities.
• Offer peer recovery support services to overdose survivors through motivational interviewing and behavioral change assessment
• Receive consent from patient to follow up to offer treatment, services, and periodic peer support
• Make regularly scheduled contact in the field or via phone to provide a consistent point of contact and pathway to treatment
Benefits of Peer Support Services

- Allows clinical staff to focus on somatic care
- Especially effective in EDs
- Can be used flexibly
  - SBIRT, Overdose, Tox Screen
- Cost effective
  - Dennis G. Smith, director of the Centers for Medicare and Medicaid Services, explained peer support as an “evidence-based mental health model of care that consists of a qualified peer support provider who assists individuals with their recovery from mental illness and substance use disorders.”
History

• Partnership between BHA, Mosaic Group, and Behavioral Health Systems Baltimore

• SAMSA-funded SBIRT grant for hospitals and FQHCs

• SBIRT effective for alcohol but not opioids
Workflow

Patient admitted with symptoms indicative of overdose

Patient stabilized, immediate medical needs addressed

Referral made to peer support specialist

Referral is made to BHSB outreach staff

Patient receives field follow-up and periodic calls to offer services

Peer conducts motivational interview, assesses level of change

Is patient ready for treatment?

Peer refers to care and assists in wrap-around services

Peer takes consent for follow-up by outreach team
### Jurisdictional Differences

<table>
<thead>
<tr>
<th>Anne Arundel County</th>
<th>Baltimore City</th>
</tr>
</thead>
<tbody>
<tr>
<td>Peers employed directly through LHD</td>
<td>Peers employed through hospital</td>
</tr>
<tr>
<td>Symptoms trigger referral</td>
<td>SBIRT screening or OD triggers referral</td>
</tr>
<tr>
<td>Two peers at each facility</td>
<td>Three peers with staggered schedules</td>
</tr>
<tr>
<td>No consent required for initiation to program</td>
<td>Refer OD cases to LHD outreach peers</td>
</tr>
</tbody>
</table>
Future Expansion

• Naloxone kit training and distribution in ED to patient and their family and friends
• Gap Buprenorphine distribution and warm handoff to treatment facilities
• Dedicated “outreach” peers at Anne Arundel LHD receive referrals from the hospital cases
• Expansion to other jurisdictions
Comprehensive Evaluation

- **Health Systems Cost Review Commission (HSCRC)**
  Measure ED service utilization post-intervention
  All-Payer claims data would demonstrate impact on cost

- **Beacon Treatment Options**
  Treatment enrollment and adherence outcomes

- **Office of Chief Medical Examiner (OCME)**
  - Overdose fatality reduction or change
  - Qualitative impact on hospital’s clinical staff
Projected Outcomes

- Reduced readmissions
- Greater adherence to medical care (ID, wound care, OBGYN, psych)
- Increased number of patients in treatment
- Naloxone distribution
- Reduction of clinical staff time spent on behavioral health problems
- Increased clinical and support staff morale
- Reduction in overdose deaths
• Behavioral Health Systems Baltimore is working with four city hospitals to expand their SBIRT screening program to include field follow up for overdose survivors by BHSB outreach peers

• Anne Arundel Local Health Department is piloting this program at Baltimore Washington Medical Center and Anne Arundel Medical Center to embed peers from the LHD in ED to become a first point of contact in overdose survivors’ path to treatment

• Mosaic Group is partnering to provide gap bupe dispensing in participating city hospitals
